

Tribal Health Camps

Tribal Health Camps:

Health is a pre requisite for human development and it is essentially concerned with the wellbeing of common man. The health behaviour of the individual is closely linked to the way he or she perceives. Outreach activities like health camps specifically for particularly Vulnerable Tribal Groups (PVTGs) are a pivotal step to meet the prime diseases during the high prone months in tribal hard to reach areas. Hence, Bi-annual health camp is needs to be organized in this areas for the community those are residing in the hard to reach areas and affecting various common health diseases like-**Malaria, Tuberculosis, Diarrhoea, Jaundice and Child malnutrition etc.**

Objectives:

- a) In order to provide primary Health care services to the tribal's living in the remote and hard to reach tribal settlements.
- b) The awareness regarding prevention, services regarding diagnosis, treatment and referral services towards tribal people.

Timings and place of the Camps:

The health camp will be organized twice in a year at the GP level, which covers all villages/hamlets of particularly Vulnerable Tribal Groups (PVTGs). Ideally the venue of Health camp should be in the School premises and host either on Sunday or holiday.

Role & Responsibility:

BPM will organize the tribal health camps by taking the assistance of MO/ (I/C) of CHC/PHC of concerned Block. Milking must be done and covering the targeted villages for publicity of the camp, two days before the schedule.
